STAGEBID™ SEED ROUND · DEPLOY

Where every dollar *goes*.

Four cumulative tiers from \$35K to the full \$250K seed, visualized by departmental allocation.

Capital is deployed across four departmental segments: **AI · Tech R&D, UX UI · Product Design, Marketing · Launch**, and **Operations · Legal**. DEPARTMENT	\$35K	\$75K	\$150K	\$250K
AI Tech R&D	\$12,500	\$32,000	\$75,000	\$110,000

TOTAL RAISE	\$35,000	\$75,000	\$150,000	\$250,000

What the pies reveal at a glance.

AI Tech R&D dominates throughout (the gold-bright slice, 36–50% across all tiers). The mix shifts as the company scales: Operations & Legal is heaviest at the Foundation tier (the offering legal lives there), then thins as a percentage while engineering and launch scale up.

The \$150K tier is the inflection point. The mini-pies make this visible: at \$150K the AI slice peaks at 50%, signaling the moment senior engineering leadership comes on full-time and the team is at full capability for a real market launch.

One flag for your sign-off. The professional UX/UI firm (Bangladesh) engaged at the \$250K tier for last-mile finishing is modeled at \$10K as a project fee. Adjust if you have a different scope or rate in mind.
